April Birthdays

Happy Birthday

Alton

April 22

Did You Know?

April is the fourth month of the year in the Gregorian Calendar. It was the second month of the Roman calendar, before the addition of January and February. No one knows for sure how April got its name. Some say it comes from the Latin aperire, meaning "to open", alluding to the opening of buds in springtime. Others say April was named after Aphrodite and still others say it was named for the goddess of Eostre. Whatever the case, the onset of April means that Spring has arrived.

Coming Up In April

Solar Eclipse

PJ Day

Music with Peggy J. & Kelly A.

Porch Prettying Party

Shriner's Circus

Earth Day"Rock" Show

Tie Dye Day

Walmart Neighborhood Market

Earth Day

Earth Day is widely recognized as the largest secular observance in the world, marked by more that a billion people every year as a day of action to change human behavior and provoke policy changes. Now, the fight for a clean environment continues with increasing urgency, as the ravages of climate change become more and more apparent every day. As the awareness of our climate crisis grows, so does civil society mobilization, which is reaching a fever pitch across the globe today. Disillusioned by the low level of ambition following the adoption of the Paris Agreement in 2015 and frustrated with international environmental lethargy, citizens of the world are rising up to demand for greater action for our planet and its people.

By tapping into some of the learnings, outcomes, and legacy of the first Earth Day while also channeling the energy, excitement, and coordination of the youth climate strikes, we can build a movement going into the 54th anniversary that goes to the very heart of what EDN and Earth Day are all about- empowering individuals with the information, the tools and the messaging that communities need to make an impact and drive change. 2024 marks the 54th anniversary of Earth Day.
